

Dynamic Graphics, Inc. Announces Enterprise Software Agreement with bp for Data Visualization and Analysis

*Agreement paves the way for CoViz® 4D software, bp-specific customizations,
new custom workflows, and support for advanced 3D velocity modeling.*

ALAMEDA, California. (March 5, 2021) – Today, Dynamic Graphics, Inc. announced the next phase of their enterprise software and services agreement with bp. Based on their flagship data visualization and analysis software, CoViz 4D, the Dynamic Graphics team of software and petroleum engineers are also providing customization services, custom workflows, and advanced 3D velocity modeling support. The software and services agreement includes a significant number of CoViz 4D and Sim2Seis licenses.

“BP has enjoyed a long and successful partnership with DGI. CoViz 4D is an integral part of our toolkit, combining an outstanding data integration environment with custom workflow options. This combination is fundamental to our management of subsurface risks and opportunities at bp, and it may also prove valuable for emerging energy transition activities such as carbon storage.”

Margarita Corzo, VP wells & subsurface digital portfolio delivery, bp

“We have partnered with bp for years—our team is lined up and ready to fully support our relationship. In today’s dynamic economic environment, it is essential for energy companies to leverage all of their data to make more informed decisions, and CoViz 4D is a key tool for that.”

Art Paradis, President of Dynamic Graphics, Inc.

About Dynamic Graphics, Inc.

Founded in 1969, Dynamic Graphics, Inc. is a US-based software company that solves special spatial analysis problems for the petroleum, environmental, and geospatial fields. Dynamic Graphics, Inc. specializes in data visualization, data analysis, and well planning with three products: CoViz 4D, WellArchitect®, and EarthVision®. For more information about Dynamic Graphics, visit www.dgi.com.

About CoViz 4D by Dynamic Graphics Inc.

CoViz 4D is a quantitative data visualization and analysis software package by Dynamic Graphics, Inc. Users can visualize and analyze multiple types of data and models. CoViz 4D is particularly strong in reservoir management of hydrocarbon assets—all of the relevant data and models from the reservoir can be visualized and analyzed simultaneously. Dynamic Graphics, Inc. recognizes that most vital data is time dependent and built CoViz 4D to handle time-based (or time-inclusive) data seamlessly. For more information about CoViz 4D, visit <https://www.dgi.com/coviz-4d-software-for-data-visualization-and-integration/>.
